

Terrorism and Armed Conflict in Democratic Republic of the Congo Worsening, Details Maryland Int'l Research Firm Brief

Bethesda, Md. – Development Services Group, Inc., and its Global Terrorism Trends and Analysis Center (GTTAC) have published a research brief on the worsening terror situation in the Democratic Republic of the Congo (the DRC).

The six-page circular uses the latest data through the end of 2022 and includes elements such as the number of incidents, the perpetrators of these acts, their tactics, the victims, and the locations.

This is the first of what GTTAC expects to be a series of research briefs outlining key issues of terrorism and armed conflict.

Given the strategic global importance of mining in the DRC, we have included a section on mineral exploitation and conflict.

You can access the brief [here](#).
